

Prairie Drought Increases Relief Problem

relief, which took place in September, the National Employment Commission stated that increases

main reason for a net decrease of approximately 67,000 in the grain total of direct relief recipients. A decrease of 85 640 in Saskatchewan alone, and 11 098 in Alberta boosted the number on relief by nearly 60 000 people. These increases in the prairie provinces are traceable to the very serious crop reverses suffered during the past year.

The staggering nature of the unemployment relief burden while
